## Foreword

This story is part of a series of children's stories with the main title "Professions". Its purpose is to introduce children to career guidance, while combining knowledge with humor and the funny side of life, making the story more interesting.

With this story, a second series begins, one that concerns almost entirely professions traditionally associated with women.

In all these stories, just as in the stories about male professions, the main heroine is Haris, while in the male-profession stories the main hero was Charalampos. Haris is joined by her friends Agapi and Elpis, who often change profession depending on Haris's profession.

I was inspired to create Haris and her friends while talking with my grandson Mario, to whom I dedicate this story.

The story includes a glossary of unfamiliar words, so that young children can understand difficult vocabulary.

The unfamiliar words are marked with an asterisk in the text, and the explanations are given below, also with an asterisk.
